

Solutions for Value-Based Success

We understand the challenges you face in supporting your member clinics to thrive in value-based agreements. Primary Care Providers are already overwhelmed by documentation overload, compounded by understaffed clinics.

For over a decade, we've been helping clinics transition to value-based payment models and know all too well the obstacles they face, especially when it comes to risk adjustment and closing care gaps. Our solutions help ACOs, payers, and clinics overcome these hurdles by automating the bulk of the manual work involved in addressing diagnosis and care gaps for all attributed patients, whether they are scheduled, unscheduled, inactive, or new.

Data empowers...when it's in the EHR.

Smartlink's solutions are much more than just an "overlay" on top of the EHR. With our proprietary interoperability platform, Smartlink Data Connector (SDC), we provide "full circle" bidirectional integration capabilities between the EHR and ACO portals. SDC integrates bidirectionally with over 90 EHRs, and can automate most of the manual ACO related workflows tying up clinic staff today.

DXInsight

Improve risk adjustment without burdening your physicians.

GapCheck

Reduce administrative burden and close more gaps.

QualityView

Manage provider engagement, gaps, and attribution status across all payers.

ChartExtract

Reduce the cost of labor by automating chart pulls.

DXInsight

Improve risk adjustment without burdening your physicians.

	DXInsight	DXInsight+
Close Diagnoses Gaps		
<ul style="list-style-type: none"> Diagnoses Gaps are provided within the EHR workflow. “Confirmed” diagnosis gaps are automatically added to the progress note. 	✓ ✓	✓ ✓
Drive Better Adoption with Fewer Clicks		
<ul style="list-style-type: none"> Diagnoses from YTD closed claims are auto confirmed, minimizing effort for providers. 		✓
Reduce Administrative Labor Cost		
<ul style="list-style-type: none"> Portal diagnosis status is automatically updated. Automate the identification of new, inactive, and unscheduled attributed patients, then automate patient outreach EHR workflows. 		✓ ✓

GapCheck

Reduce administrative burden and close more gaps.

	GapCheck	GapCheck+
Close Care Gaps		
<ul style="list-style-type: none"> Care Gaps are provided within the EHR workflow. Gap diagnosis & procedure codes are added to the progress note. 	✓ ✓	✓ ✓
Drive Better Adoption with Fewer Clicks		
<ul style="list-style-type: none"> EHR documents are scanned to see if “open” gaps are resolved. Resolved gaps are auto confirmed, so the provider doesn’t see it. 		✓ ✓
Reduce Administrative Labor Cost		
<ul style="list-style-type: none"> Results from addressed gaps are automatically transmitted to the payer or ACO portal. Automate the identification of new, inactive, and unscheduled attributed patients, then automate patient outreach EHR workflows. 		✓ ✓

QualityView

Manage provider engagement, gaps, and attribution.

Visualize Quality Performance	
<ul style="list-style-type: none"> Filter or drill down by payer, practice, year, and measure. View measure performance against target and identify measures with the most gaps. 	
Track Provider Engagement	
<ul style="list-style-type: none"> Visualize usage and impact of DxInsight and GapCheck. 	
Manage Attribution Across All Plans	
<ul style="list-style-type: none"> Filter attributed patients and easily see patients that are new, inactive, and active unscheduled. 	

ChartExtract

Reduce the cost of labor by automating chart pulls.

Automate the Extraction of Patient Records
<ul style="list-style-type: none"> Auto extract patient charts from the EHR after each encounter. Send charts automatically to each ACO/CIN.
